QSOL Unified Field Framework: Resonance as Embodied Physics

A crosswalk between Unified Field Theory, archaeoacoustics, and ritual performance

Abstract: This working paper presents a practical mapping between physical field concep
(metric, symmetry, coupling, quantization) and their acoustic/architectural and cultural
correlates. Ancient resonant sites and microtonal instruments are treated as macroscopi
experiments that demonstrate harmonic unification of matter, energy, and consciousnes
framework provides three code layers—sexagesimal (phase wheel), trinary (Digital DNA)
codon (mod 64)—to program ritual action and analyze frequency clusters measured at
archaeological sites.

UFT–Ritual Correspondence (condensed)

• Unified Field / φ, $F_{\mu\nu}$ – Chamber standing wave / total acoustic field – Shared mood/attention field

• Metric curvature $g_{\mu\nu}$ – Geometry & materials define modes – Architecture shapes consciousne

• Gauge symmetry – Harmonic ratios & phase coherence – Social rhythm / ritual order

• Coupling g – Vocal pressure ↔ cavity response – Entrainment & bonding

• Quanta / eigenmodes – Overtones, nodes – Distinct thoughts/emotions

• Symmetry breaking – Microtonal bends/detuning – Creativity, catharsis

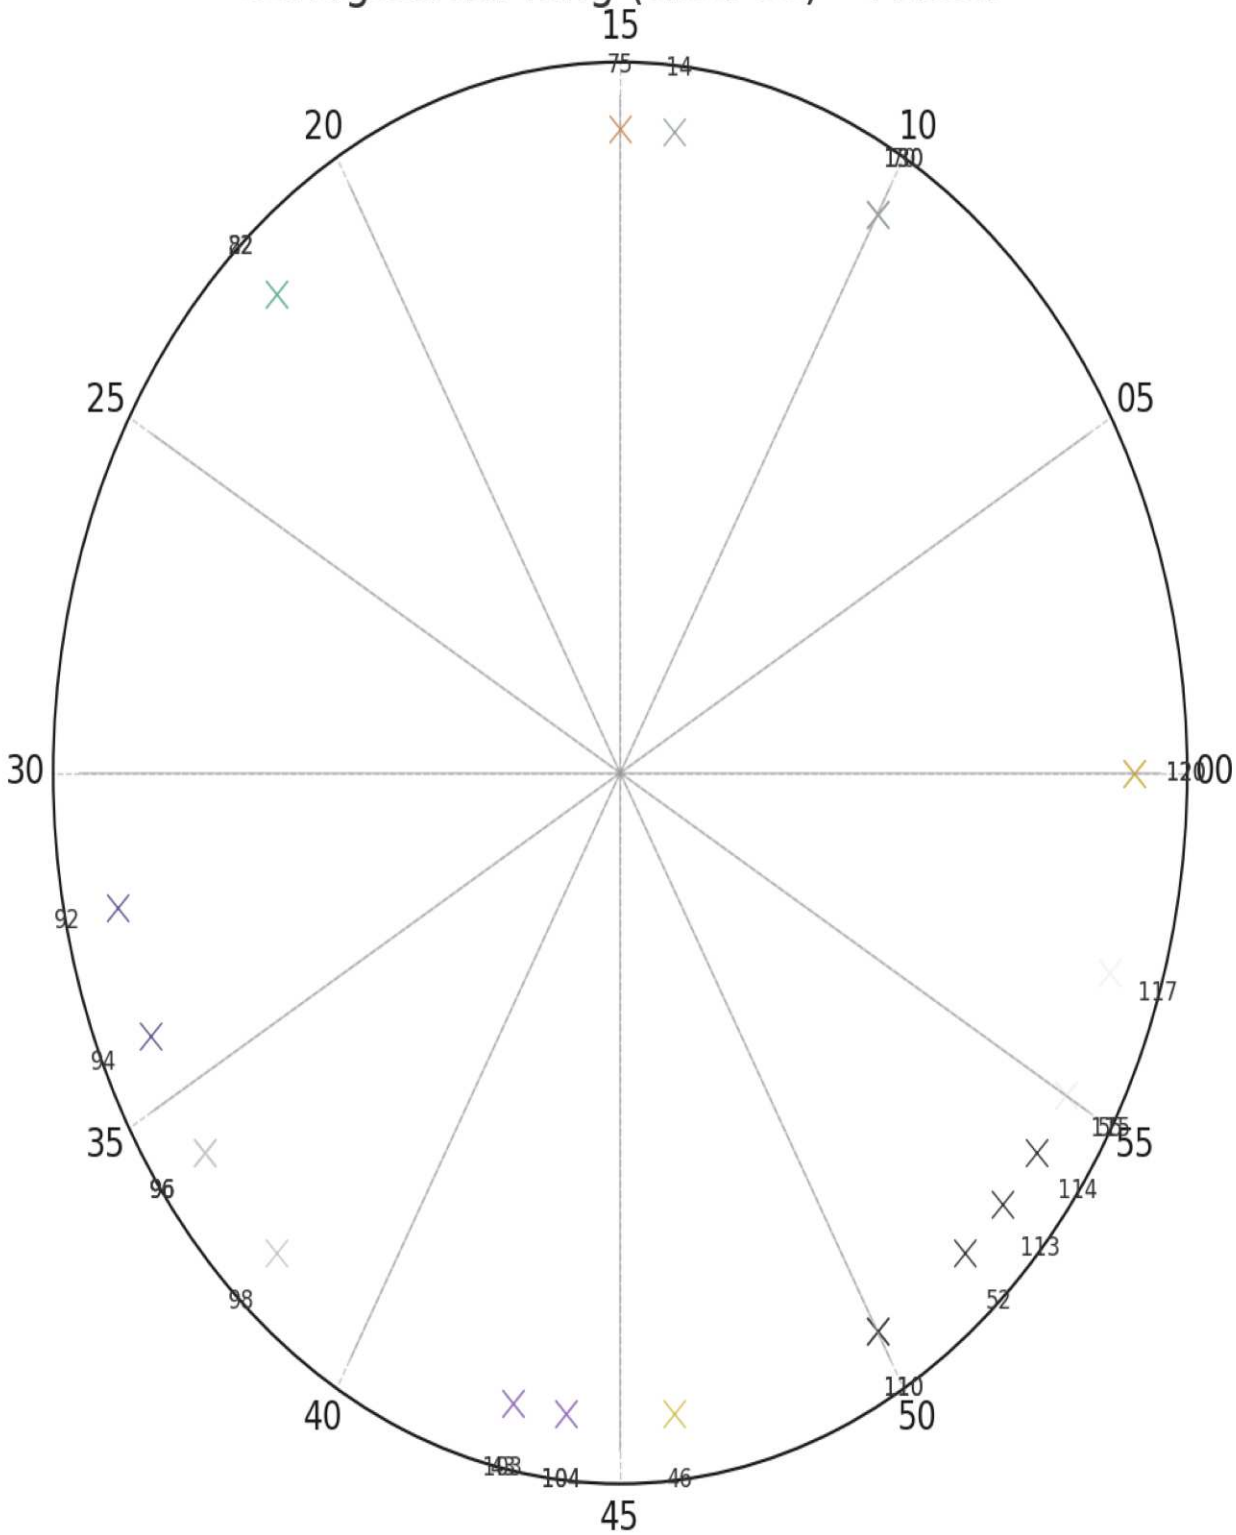
• Compact dimensions – Subharmonics/microtones – Subtle/liminal states

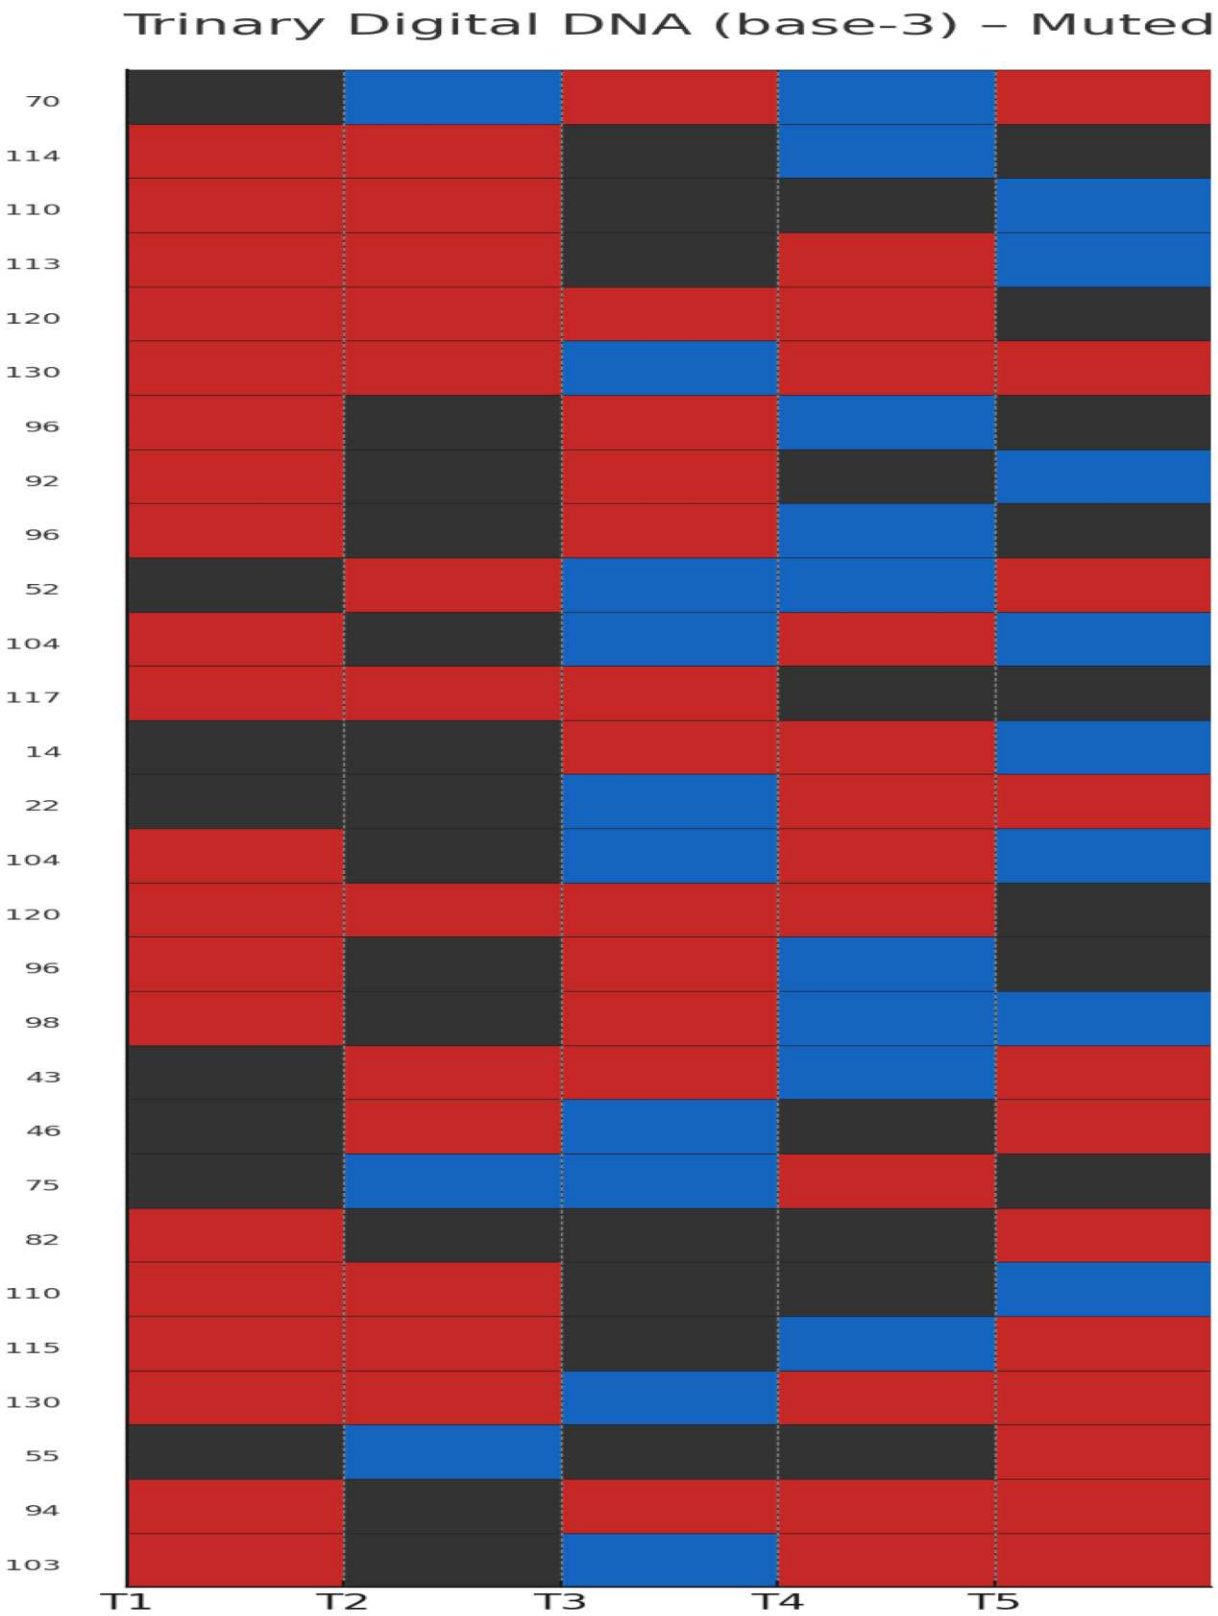
• RG feedback – Resonance → performer → retuning – Ritual learning loop

• Superposition – Beating drones, multiphonics – Ambiguity, dream logic

• Measurement – Perfect lock-in (peak Q) – Insight, laughter, ecstasy

Sexagesimal Ring (mod 60) – Muted





Trinary Digital DNA (base-3) – Muted
